

AKATU ~ SU From UIO

阿卡图 ~ 来自哇偶的苏族人

（老钉译，2024 年 8 月 4 日）

Beloved Friends Of Light! 亲爱的
光之朋友们!

I Come To You In These Moments

With A Reveal Of Beings That Might Sound Strange. Indeed, These Souls Are Not The Only Race That Is Very Different From Life In Your Current Awareness. Allow Your Mind To Be Open As We Explore Life On UIO. 此刻，我来向你们揭示一些听起来可能很奇怪的生命。事实上，这些灵魂并不是唯一与你们当前意识中的生命截然不同的种族。在我们探索哇偶星球生命的过程中，请敞开你们的胸襟。

This Star Is More Of A Spinning Rock Than A Star. It Began As A Large Meteor That Was Black And Charred

As Gases Seemed To Burn Out. But Tiny Microbes Were Moving Within The High Temperatures. These Lifeforms Moved And Lived With Intention As They Survived. As The Rock Stabilized, The Spirit Of Creation Breathed Life With Spirit Into The Tiny Lifeforms. They Became Souls That Would Have Lives With Consciousness And Feeling. Pleiadians Call These Souls SU And Their Place Of Dwelling Is UIO. These Lives Were Created With The Understanding Of Duality With Free Will.

与其说是恒星，不如说它是旋转的

岩石。它最初是一颗巨大的流星，由于气体似乎燃烧殆尽而变得焦黑。但小微生物却在高温下活动。这些生命体有意识地移动和生存着。随着岩石的稳定，创造之灵向这些微小的生命体注入了生命的灵气。它们变成了灵魂，拥有意识和感觉的生命。昴宿星人称这些灵魂为苏族人（“SU”），他们的居住星球是哇偶（“UIO”）。这些生命是在理解二元性和自由意志的基础上被创造出来的。

The SU Move Freely Among Rocks
And Mountains. They Stand Three
Feet Tall With Soft Fur Like

Coverings Of Purple. They Have Two Eyes That Are Large Black Circles On Each Side Of Their Head. Their Heads Are Oval In Shape With A Small Slit Mouth And Nose. They Have Four Short Appendages That Move As Legs. They Have No Arms And Lean Forward To Graze In Areas Of Sticky Plants. The Nourishment Is Pink And Contains All Needed For Sustenance.

苏族人在岩石和山脉间自由移动。他们身高三英尺，身上披带着紫色的软毛。它们有两只黑黑的大圆眼睛，分别长在头的两侧。它们的头呈椭圆形，嘴和鼻子都有一条小缝。

它们有四条短短的附肢，可以像腿一样活动。它们没有手臂，身体前倾，在有粘性植物的地方吃草。它们的食物是粉红色的，含有维持生命所需的一切营养。

As They Moved In The Early Stages Of Development, They Scooted Flat On The Ground. Over Millions Of Years, Their Posture Changed To Being Upright As They Communicated More Fully And Learned About The Possibilities Before Them. They Understood That Life Was Full Of Challenges And Their Days Were Wrought With Both

Joy And Discontent. They Live Approximately Four Hundred Years And Incarnate Back Into Their Race In These Moments Of Being.

在发育的早期阶段，它们附身疾走。经过数百万年的发展，随着更充分的交流并了解到面前的各种可能性，他们的姿势逐渐变的直立。它们明白，生活充满挑战，每天都有喜怒哀乐。他们大约能活四百年，并在自己的种族内化身。

Their Desire To Travel Or Even Move Around The Location Of Their Home Was Impossible As They Performed Poorly In Understanding Basic

Technology. With Temperatures Of Freezing Air Followed By Extreme Heat, They Noticed Large Bubbles Seemed Stationary And Even Solid At Times. These Were Utilized With Compounds And Chemicals To Become More Stable To Allow Shapes And Hardened Areas To Be Formed. Over Time, The Bubbles Would Transport The SU To Locations Around UIO. Their Knowledge Has Not Increased And In These Moments, They Remain Quite Primitive In Comparison To Stars That Offer Flight.

由于对基本技术的理解能力较差，

他们无法实现旅行的愿望，甚至无法在他们的家园附近移动。在极寒和酷热交替的温度下，他们发现很多固定的大气泡，有时甚至呈固态。他们利用化合物和化学物质使这些气泡变得更加稳定，以便形成形状和硬化区域。随着时间的推移，气泡会把苏族人运送到哇偶的周围地区。他们的知识并没有增加，就在此刻，他们与实现了飞行的恒星比，仍然相当原始。

Pleiadians Have Visited But It Has
Caused Great Fear Among The SU.
They Are Not Ready For Other Races
To Communicate But We Will

Continue To Watch And Wait. We Honor Free Will With All Life.

昴宿星人曾经来过，但这在苏族人中引起了极大的恐慌。他们还没有准备好与其他种族交流，但我们会继续观察和等待。我们尊重所有生命的自由意志。

The SU Do Not Have Mates With Absolute Families And They Join With The Opposite Sex To Procreate. They Have Feelings Of Sadness As Well As Great Humor As They Enjoy Their Offspring. There Are No Private Dwellings And Food Is Shared In Areas Where Ground Sustenance Is

Plentiful.

苏族人没有绝对家庭的配偶，他们会与异性结合繁衍后代。和孩子们在一起的时候，他们也会感到悲伤，并有强烈的幽默感。没有私人住所，大家都是在食物充足的地方分享。

Animals Are Not Seen On UIO And This Is An Unknown Concept. Basic Survival Is A Daily Task And All Join In To Make This Happen. The Intelligence Is There But They Lack Teaching And Wisdom. They Remain Much Like Children Who Play And Live Beneath Rocks With Areas Of Rest And Relaxation.

在哇偶上看不到动物，这是一个未知的概念。基本生存是他们的日常任务，所有人都参与其中。智力是有的，但他们缺乏教育和智慧。他们还像孩子一样在岩石下玩耍和生活，那里只有休息和放松的地方。

It Is Hard To Imagine Beings That Have Not Progressed More Efficiently. But It Is Up To The Individual As Well As The Collective To Move Forward. They Remain Healthy In Their Own Perspective And Until They Reach A Place Of Reason That Tells Them That Life Can Be Much More, The SU Will Remain In A

Primitive Stance With The History Of Expression From Microbes.

很难想象有哪些生物没有更有效地进步。但是否前进要取决于个人和集体。他们一直健康地活在自己的视角里，直到他们抵达一个理性的地方，告诉他们生活里的东西要多得多，“苏族人”将继续保持原始状态，和它们从微生物表达开始的历史。

They Have Self Awareness With The Beginning Of Their Breath From Spirit And Pleiadians Hope The Collective Consciousness Will Guide Them To A Greater Experience.

他们自精神的第一口呼吸始，就有自我意识。昴宿星人希望集体意识能引导他们获得更美好的体验。

In Light There Is Understanding. 有光就有理解。

With Love There Is Peace. 有爱就有和平。

EN EEKE MAI EA! 恩溢满爱！

I Love You So! 我如此爱你！
