

Ringmakers of Saturn

土星环制造者

NASA Voyager Mission, 1980

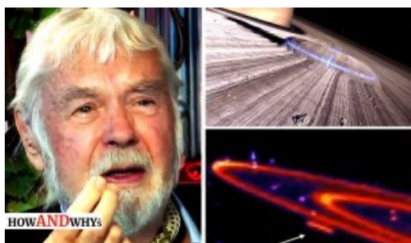

Neioh 的叙述

保存下来的照片只是少数，与因对未知恐惧而在地球上传播而丢失或销毁的大量影像相比微不足道。这

是通过昴宿星人揭示光之力量的又一例证。这些不是人们常见的飞行器，而是我们根据需从一点移动到另一点的移动站。它们像母舰一样旅行，但大小与地球相当。

一个移动站可以容纳数千人，其他种族也会在此参加会议。来自昴宿星、大角星和其他友方星系的母舰会直接飞往该站，当巨型坡道打开并有安全措施时，各族登上站台，他们的母舰则离开。这些活动在许多星系中进行。这些是银河联邦的会议，这些移动站无法以任何方式被破坏。它们非常适合传递信息和报告宇宙中的活动。会议结束后，来自各族和星系的母舰按顺序到达，各自离开。移动站会为下一次会议重新定位。

Ex-US Army Major Released NASA Footage Of 2000-Mile-Long UFO Near Saturn

The search for alien life on Saturn's moon has recently got a boost.

Scientists have found out that Enceladus, one of Saturn's 83 moons, has building blocks of life present under its surface. Similarly, unlocking the mysteries of Titan's landscape could open doors in the quest to find extraterrestrial beings. Are Saturn and its moon ... Continue reading

How and Why's

Bob Dean 的背景

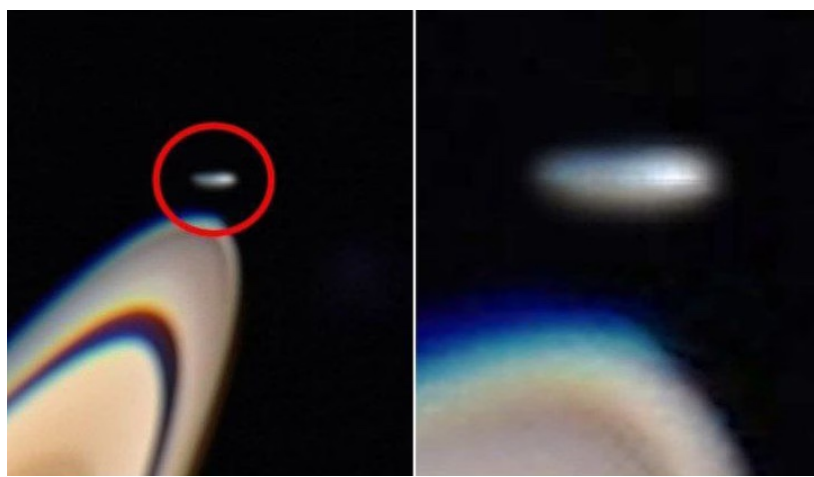

Bob Dean 于 1963 年至 1967 年在北约总部工作。他于 1960 年 4 月 5 日加入美国军队，曾在朝鲜参与战斗服役，后在越南服役。他于 1976 年 10 月 31 日以指挥军士长的身份从军队退役。

2009 年 7 月 25 日，他发布了一组照片，声称这些照片长期存于 NASA 档案中，但 NASA 不愿公开让世人看到。在一次讲座中，他展示了由他的朋友、NASA 艾姆斯研究中心及洛克希德·马丁公司的科学家和工程师 Norman Bergrun 博士提供的 Voyager 任务照片。Bergrun 博士在 Voyager 任务中扮演了关键角色，该任务的探测器负责拍摄土星、其环和卫星。

这些任务照片中显示了一个悬浮在土星环外的巨大不明飞行物，尺寸

大约与地球相当，相关内容发表在
《Ringmakers of Saturn》一书中。

NASA Voyager Mission, 1980

Neioh — What is seen in the photos
that were preserved are a small
number compared to the significant
amount of footage lost or disposed of
due to fear of the unknown spreading
across Earth. This is another example
of the many opportunities to reveal

the Power of Light through Pleiadians. These are not Crafts as most have seen, but are moving Stations from point to point as we choose. They travel as Motherships but are as large as the Earth.

Thousands can occupy one Station and other Races will join in meetings here. Motherships from the Pleiades, Arcturus and other friends will fly directly to the Station as it opens with giant ramps and security as Races board and their Mothership leaves the premises. These activities are carried on in many galaxies. These are meetings of the Galactic Federation and these Stations cannot be harmed in any way. They are excellent for transferring information and reporting

activities throughout the cosmos.

When meetings have completed, Motherships arrive in sequence from each Race and Star System and they leave. The Station will relocate for the next meeting.

Bob Dean worked at NATO headquarter from 1963 to 1967. He joined the US Army on April 5, 1960, and also served in combat service in Korea and later in Vietnam. He got retired from the army on October 31, 1976, as a Command Sergeant Major. On 25 July 2009, he released a set of photographs that he claimed had been in NASA archives for a long time but the agency did not want the world to see them. In a lecture, he presented photos from the Voyager mission

received by his friend, Dr. Norman Bergrun, a scientist and engineer for NASA ' s Ames Research Centre and Lockheed Martin. Dr. Bergrun played a key role in the Voyager missions, the probes that were sent out and tasked with photographing Saturn, its rings, and moons.

There are photos from that mission of a large unidentified flying object hovering just outside Saturn ' s rings, approximately the size of Earth, and is published in the book,

“Ringmakers of Saturn.”
